

Feng Shui Positions Class 6.

EVERYTHING ELSE.

By now you have with you the basic tools you need to read a house. Remaining are a few extra pieces to fill in.

There are certain objects in houses which have a significant impact but don't really fall into the category of what we have done in the past.

Classes 7 and 8 will be focused on reading with the floor plans that you have sent us. We will be looking at every single room and then the whole picture.

Today`s class

- Swimming pool
- Trees
- Stairs

Swimming Pool.

What is a swimming pool?

1. A large body of water.
2. Water represents emotions.

Other feng shui experts claim that having a swimming pool in your house will bring in wealth or good luck.

But, we talk about it as a large body of still water which collects bacteria inclusive of chemicals.

These bacteria together with the chemicals evaporate into the air as of the natural process of the water cycle. People close to the pool will breathe in these chemicals and become ill. They will also get allergies with the skin and the nodes.

No swimming pool is going to make you rich. It is only going to give you allergies. Even salt swimming pools are bad for you because it is not natural.

Aur's Salt Pool.

Aur has a salt swimming pool which she has positioned it in a way that the evaporated air is not blowing into her house.

When building a swimming pool you have to put a lot of thought into it. Awareness of the wind direction at different times of the year is essential. The wind changes direction every three months and to gauge if the wind blowing across your swimming pool will not blow into your house is a daunting task.

Aur's pool is similar to the ancient roman structures which have a roof with pillars but is empty in the middle. What it actually does is it forces the wind to go out and away from their house.

Water represents emotions. Land is stable and water is moving. Whenever you take away the stability of an area it creates a fluid phase like emotions.

Lakes

Will a lake affect you in the same way?

As long as the water is alive you won't have a issue with any body of water. If it is dead the problems start because the water will contain less oxygen and be infested with bacteria and it gives off a foul smell

Swimming Pool Shapes.

Many people like keep a circular water fountain in front of their homes.

Do you remember what the shape of a circle represents?

Circle denotes gold. This shows us that everything can change. You will have plenty of problems because people can change their mind all the time.

Any story or problem that comes along will twist to something that you do not expect.

Other feng shui experts say that you can't have a swimming pool with a sharp corner because it will create poison arrows which will bring about bad luck for you. This information is incorrect.

The shape of swimming pool A is not harmful. This is why majority of the pools are built like this.

But the water in it becomes unhealthy if the pool is not cleaned frequently. The shape represents wood which is naturally good with water.

The water will be a home for a lot of micro-organisms like bacteria and algae because it attracts nature. A leaf might fall in and it will be ignored. A wood-styled pool will most likely be ignored. Just like a tree in the forest. Although it is ignored it will grow on its own.

Aur's Exposure

The only swimming pool that really amazed Aur was when she went to read a very wealthy client. His pool was shaped like the letter C with its end molded into a cave. Water from the Himalayas came down it like a waterfall. He changed the water every three months. He has people cleaning it and mixing it with oxygen every day.

When you take care of everything you have you will automatically be rich.

Poison arrows

Many people are under the impression that having a swimming pool with a sharp edge pointed towards your house will bring in lot negativity to you or your house. This is not true and you will not get affected by it.

Hen or the Egg?

If swimming pools don't make you rich why do all rich people have swimming pools?

That is because they were already rich before they built the swimming pool. They also have a lot of money to keep it clean and maintain it.

Best way you can prove it is by buying an inexpensive pool to the poor and see if they get rich.

Grid analysis

According to the feng shui property grid, the position of the pool creates a separate influence to different people in the home. The effect is the same whether the pool is above or below the ground.

Why?

Earth stands for stability water denotes fluidity. If you substitute water for earth you are taking away solidity out of a position to replace it with fluctuating emotions.

Feng Shui is the effects that you get from everything around you.

Swimming pool in the # 1

- **Men tend to be sick and moody often**

The men in the house will be emotional and nag a lot. He will also change his mind all the time. The pool will be used only when they have a lot of guests.

Swimming pool in the # 2

- **Both men and women will be moody.**

- **Symbolizes a division between the man and the woman.**

Both genders will be constantly having arguments because of the constant flow of emotion.

Swimming pool in the # 3

- **Woman tends to be sick more often**
- **People who are the pool would use it for a quick dip or a daily exercise.**

A woman has to have a reason to do something. So if anybody gets into the pool it usually will not be used for pleasure. There will be problems in the house because the woman is sensitive and change her mind all the time.

Swimming pool in the #4

- **Females, especially teenagers will tend get sick and be moody.**
- **Communication breakdown mother and daughter or daughter with another daughter**
- **Not likely to invite others for a pool party.**

Only very close friends or family will be invited for a swim. Teenage girls feel insecure when others see them in the water. They prefer to show themselves off when they are beautiful. If they call their friend to hang out they will simply sit by the pool and still look beautiful. They don't want to mess up their makeup.

Swimming pool in the #5

- **Difficult for this couple to have a daughter.**
- **When young she would be extremely emotional.**

If a woman is expecting a baby and you have a swimming pool in this area she is most likely to get a son and not a daughter. If they do get a girl her personality will be like a tomboy.

Vicks experience - I know someone from my family who has a swimming pool exactly on this spot. They didn't have the daughter when they were living in this house. But after moving in, the little girl became extremely emotional, always fighting with everybody. As she grew up, she got calmer but her personality is more like a tomboy. Very stubborn and strong minded. Not as fluid or moving as she was young.

Swimming pool in the # 6

- **Children will fight often**
- **Swimming pool wouldn't get used much.**

If you have a daughter and a son they will fight often. Not between two sons or two daughters. It is very unlikely to have a pool party here. It will be always dirty.

Like everything in the #6 area the pool too gets neglected. If you have a water fountain here it will be broken down or not in use.

Swimming pool in the # 7

- **Boys will have health and emotional issues.**
- **Swimming pool used purely for fun.**

If you have a house with a swimming pool in this area and you have a boy the chances are that he will be gay. He will be emotional and sensitive.

Nobody will use the pool for exercise.

Swimming pool in the # 8

- **Breakdown of communication between a father and a son or an older brother and a younger brother.**

- **Pool used for parties and guests**

You can expect crazy pool parties with toys is your swimming pool is situated here.

Swimming pool in the # 9

- **Everyone can get sick if the water is not kept clean.**
- **Everyone`s life is unstable, always fluctuating**

Molds

Aur saw feng shui for a very rich person. He had made a green house in this area. Since the region he lived in was extremely hot his green house contained plants that were suited for moisture like moss. The fact that they overlooked was molds. It slipped their mind that moisture brings in molds which can go into your system and affect your brain.

Molds literally travel through the air and enter your lungs and affect your brain. People have had to take in large amounts of antibiotics to get rid of the molds in their brains.

.If you position it in this area it means everyone will get affected

Water tanks and Jacuzzis.

The effects for water tanks and Jacuzzis are also the same as swimming pools.

You can see how the people use water in case of the tank.

If the tank is in #1 which is Aur`s personal favorite spot you can shower with very strong water. You will also use it once or twice a day and not often. But if the tank is in #3 people will be using it all the time. And if no people in the house there is sure to be a leak.

Spas and Jacuzzis will have effects similar the pool unless it is in the bathroom where you can drain the water off after using.

Trees

Only a few areas will be discussed in this section because trees have a significant affect only a few areas. Small trees will not have much effect. The tree has to be fully grown and rooted down.

What is a tree?

1. Conscious being
2. Holds together the earth literally holding us up
3. Absorbs vibration and pollution
4. Give oxygen (but also carbon di oxide at night)

A tree is a conscious, living being. Modern science now accepts that the trees in a forest communicate with each other through their roots. Their root system share their chemical and nutrients with each other. And especially when there are older and younger trees, it is proven that the older trees nurture and nourish the younger trees to help them grow. It is like they care and communicate with each other.

For example, if there is a fire happening on one side of the forest they will communicate this fact to the other side through their roots.

Different studies have shown that trees when attached to a type of lie detector react consciously to different stimuli. If you hurt it by ripping a leaf or stem, it would stimulate certain reactions just like fear in our own bodies.

When animals become aware that they are about to die they release a toxin into their system. Similarly vegetables and green leaves give off a poison to prevent or deter the animals from eating the other plants next to it.

Trees literally hold us together. Since the earth is always sinking and moving slightly tree roots hold it together. It also absorbs the negative vibration coming from the roads prevents it from harming us. Their leaves filter out pollution by taking in carbon-di-oxide and releasing oxygen.

One thing to keep in mind is that although green plants release oxygen in the day they send out carbon-di-oxide in the night. So it is best not have any your bedroom at night.

If you like having indoor plants as your décor it is always better to have in it a area that is well ventilated.

Tree in the #1

- **People are strong willed but stubborn**
- **Man will always have support**

It should be a big tree because it has more soul. If speaking scientifically the surroundings will have more oxygen and stability.

Tree in the #2

- **The deeper the root is in this area the more balanced and grounded everyone is in this house.**
- **Good for both men and women.**

Explanation – having a large tree in this area means you have a ghost in this area. If you have a good ghost you have nothing to worry about. If it is a bad ghost then your life is going to have plenty of complications.

How do you know if you have a good ghost or a bad ghost?

The form of the tree will tell you. If the form makes you comfortable and relaxing it's a good ghost. If it is a bad ghost the tree will look scary to look at. The roots of the tree in Aur's house resembles a couple hugging.

There was once a man a man with a big property who wanted to build a village. This property had a tree in this position and could not cut it down for six months. Every time somebody tries to cut down the tree, they either get injured or meet with an accident.

Tree in the #3

- **Woman will be strong minded and stable**
- **People will be grounded in their femininity.**

When you have a strong mother everybody will feel strong, good and confident because they feel like their mother is very tough. If you have a mother who is very tough you can't go over them.

Tree in the #9

- **If this tree hangs over the house, everyone will have problems and they will fight each other.**
- **If it doesn't everyone will be strong willed and independent but not fight with each other.**

The people in this house will be strong will be and independent the difference being the branches hanging over the house or not.

Other areas won't have a big effect.

If you have a direct hit having a tree in the #5 or #7 will help you because the roots will absorb the vibrations and the leaves will purify the dust and pollution.

Question

Will you have bad karma if you cut down a trees in your property?

Yes, unless you ask for permission.

But it is always better to remove and plant it elsewhere because plants will release toxins when cut. If the plant is big the toxins released is big.

Stairs

In Aur's point of view, stairs talk about money. If you are in a shop, the basement or the floor upstairs will hold your stock. If your stairs are in a position that will not be used it means that you will not be able to sell your product.

Every time Aur reads a shop the first thing she looks into are the stairs. This also counts for elevators

If you have a stair that goes winding up it means people will have problems with their knee. You will no longer be able to communicate with each other. The reason for this is the way the wind hits you.

Stairs in the #1

- **When somebody goes upstairs they will stay up there for a long time.**

Just like anything in the man area it happens very rarely. But if it happens, it happens in a big way. If they go up they will spend most of the day there. Nobody will be running up and down constantly.

Stairs in the #2

- **Goes up and down the stairs often.**
- **Often changing their minds about where to be.**

The people in a house with steps in this area forget the reason they used the stairs. They get hold of a totally irrelevant object they came up for.

Stairs in the #3

- **Go up and down frequently.**
- **Be very active while at home.**

You will go do something over here and go do something over there. Will keep moving around

Stairs in the #4

- **Hardly ever use the stairs at all. Only when needed to.**

Stairs in the #5

- No guests upstairs.
- Will only go up when want to go to sleep.
- Hardly ever used.

Teenage girls don't trust outsiders easily. Everything is about privacy. If there is an elevator here in this position, nobody will talk to each other even if they live in the same building and see each other every day.

If it is in your home it will be rarely used usually only when you go to bed.

Stairs in the #6

- **Everyone in the house is in their own world.**
- **No one will know where someone is, up or down?**

The only time you can have a stair in this position is when you have a two story home and it is actually split into two apartments.

Both families will not talk to each other. It doesn't mean that you will have fights.

Stairs in the #7

- **Always running up or down the stairs to get something.**
- **A hotel having steps in this segment will have guests going up down all the time.**

There was a shop in Chinatown where Aur once went. Every time the worker comes down with something he was yelled at and asked to go back upstairs to bring something else.

Stairs in the #8

- **Did I forget something? Go up and down the stairs often and quickly.**

This area is similar the #7 but here you forget and it happens only in a period of time. Not regularly like in #7

Stairs in the # 9

- **The people in this house will be rich if your stair case that splits both ways.**

Whether they are really rich or are they rich on the surface with a lot of debts can be found out only by the stars.

If you can see the stairs when you enter it means the people in the house are not hiding anything. Everything is out in the open. But if you cannot see the stairs from the entrance it shows that you are hiding a lot of things about yourselves.

#2, #4, #6 and #8 will usually be a fire escape.

Question - Does it matter if the stairs go up the right or the left??

No. You cannot read like that..

But,

If the stair way is in the #4 and goes up to the #2 then it means this family has money.

Not lot of people has a stair like this because you will be wasting your area.
