Intro discussion:

How will you use everything you have learned in the last 7 weeks of classes? Many people come out of a class feeling overwhelmed, as if they have stepped through a portal into a bright new world and their eyes are still adjusting to everything they're seeing.

That's natural, don't worry.

This IS a completely different way to see things and to understand the world. It's also indepth, and complex with many nuances because, it's life.

Life is full of nuances and tiny little decisions and choices that can change the course of everything. Taksa is the same.

When you look at the Taksa, it's important to first gather as many "keywords" as you can. Ie:

1: Wants to look good, perceived authority (not real), careless, selfish, motivated etc.

In fact, try to make a list for yourself for each of the numbers and days of the week as we have mentioned in this course. It will help to memorize these key words and phrases.

The other thing to keep in mind is that to fix anything in our lives, we must first come to understand it. As we said in the earlier classes, even Einstein said that given an hour to solve a problem he would spend 55 mins understanding it first and only 5 mins on solving it.

This is because, once you fully understand something for what it is, the solution to any problem will become naturally evident. You can understand with Taksa how a person is, what makes them off balance and what it is that they do which is not good for their own future.

The more you understand them through revision and practice...

...The more solutions and pathways will become naturally evident to you.

Taksa Influence: Age

When you are a child Thursday you will be the kind of child that asks a lot of questions and are always curious.

Parents will likely get annoyed with a lot of their questions. Especially if they see their kids as just kids. They won't see them as an adult and won't explain things.

Because of this, Thursday children will often feel like: why do I have parents like this. Why don't they love me or give me the attention I want?

Plus the way Thursdays think is so different so their parents will often feel like "Why do you think like that?" or "You shouldn't think about that."

But...

When you become an adult you become quiet more, you don't talk that much. You become totally different than a kid. You don't argue with your parents anymore. Whatever they say you still act and to the same thing you want. You don't care what others say anyway.

The point to be aware of is that once you become an adult, you've built up your own identity and the personality becomes more set.

Also because when you are an adult you have a lot of things in your mind.

To read an adult, there are many factors to keep in mind. Their career, their culture and upbringing, their religion, relationship, age etc. These are all factors that influence an adult's personality.

But as a child, an individual has not yet been greatly affected by these influences yet. So it is easier to see a child's personality according to the day of the week they are born and the time of birth. They are more pure.

The older an adult becomes the more factors there are to read the person.

1 Boriwan	2 RU	3 Deat
6 Kalakini		4 Sri
8 Montree	5 Usaha	7 Moola

When Tuesday's are children they're quiet and don't talk but follow everything you tell them. But when they become an adult, they feel like it's their responsibility to take care of everyone. They become private and have their own life.

Age is a Number

You can tell according to the number of a person's age how they will act or be in that year from the meaning of the number of their age. But, before we get started....

...Keep in mind what the personalities and elements are for each and every number.

Quick Recap:

1 King

2 Housewife

3 Soldier

4 Ambassador

5 Mentor

6 Banker

7 Farmer

8 Politician

9 Monk

0 Brat

Note about Development

0-3

From the day a child is born until they are 3 years old lays their initial mental foundation. It creates their thought patterns, beliefs and values.

3-6

This is the time when a child's core personality is determined. So much of your personality is set by this time that some experts believe up to 90% of your personality is "set in stone" during this time, which will then last your entire life through adulthood. Once you are 7 years old, the foundation is set.

1

When you're 1 year old, everyone does everything for us. We can't survive without others. Like a little king.

You cry when you want something, you make disaster and drama for other people when you want something. Similarly to a Sunday person, when they have a problem they make it a large issue or drama in other's eyes.

2

We begin to talk, chit chat, nag and get things from other people. We become to be social.

Two year old kids begin to talk but don't have "human language". The way they do is just making noise and others have to try to understand them. They try so hard to communicate and be with us. "Like a radio that can't stop".

3

Begin to command and tell others what we want. Have our own opinion and preferences.

Especially a girl at this age. At 3, a girl will start saying things like

“I don’t want to wear that.” “I want to wear this dress”. “I don’t want to eat this”.

This is the age that kids start to try to get whatever they want.

4

Start to do and pick whatever we want. Start having problems when parents don’t give me what we want.

They even explain and say things with their “reason” about why they want the things they want. Sometimes the parents can even be shocked by the child’s reason because they cannot find fault in it, but they still don’t want to give the child the thing they are asking for.

This is the age when children will also start to say things that may shock you that they learned from their parents or those around them. Like for example a 4 year old calling someone a “slut” because they heard their mum say the word in passing.

5

We start wanting to know the reason and answer for everything in the world. “Why....?”

Kids this age will often ask so many questions that their parents won't even know. “How does the TV work?”. “How does the ink come out of a pen?” and they will expect their parents to have the answers to everything they're curious about.

6

We start to understand the 7 sins: Wrath, Envy, Greed, Sloth, Lust, Gluttony, Pride.

This is the year when they become truly lazy and start thinking more selfishly. For example, when they are 5 years old and you ask them to do something, they will oblige. But once they become 6, they will be more defiant and try to do whatever they want to do.

7

We want to become an adult. We become more private and start talking less with your parents.

7 years olds start to feel like they want to have their independence. They don't talk as much with their parents because they don't want their parents to nag at them or yell at them for something. Instead, they want to have their privacy and do things their own way.

“I'm not a baby anymore.”

8

We start to act “weird” in our parents’ minds. Differently than who we were before. Because after 6, you begin to be who you are. At 8 you begin to try to escape your parents influence. You lie or avoid trouble with them.

9

We start to have our own world and stop sharing everything about our lives with our parents. When you’re 9, you begin to do everything and think for yourself. This age you become more quiet and listen to your own friends and other people around you instead of your parents.

10-19

We want to look good and be accepted by everyone. We crave attention and want to be in the spotlight. This is the time that we don’t worry with anything. We feel like we’re the best on earth and do everything for our own pleasure.

20-29

We become very social and do whatever we feel like. We love to have fun and don't think too much about the future. It's the first time we have money and feel like "I can do whatever I want, buy whatever I want, go wherever I want".

30-39

We start to think about our future. Want to make our own life and develop our skills. We try to find a way to be special and start dreaming about success.

You want to become successful and have your own business. You want to become better in the way of other's expectations. You start looking for status amongst your peers.

40-49

We know how to use our connections in life and know how to use people to get what we want. This is when we begin to build our network. This is when we know a lot of people who have achieved success in their own way and know how to use them.

50-59

We either: begin to use our expertise to give advice to people. Or become very stubborn, depending on the personality. When you're this age you feel like you're the best already and start to feel like we have been working for a long time and that they deserve respect.

60-69

We do whatever makes us happy and daydream a lot. Because, when you become 60, you already think about your retirement and start to think more about what you would like to do with the remaining time on earth.

But, if you're not successful and you are this age, it will be stressful. Because you will have a lot of desire to do things with your life but you won't have the money to do it.

70-79

We do everything routine. We don't want to do anything anymore. Before 60, you're looking forward to retirement. But after you've actually retired, you feel that everything is so boring. That there is nothing to do. You plod along in your life and your body starts to become stiff. You become like a kid again, bored easily. Unless you are with friends your age with whom you can talk about the past.

Similar to the life of a farmer (7), who lives a very basic day-to-day lifestyle.

80-89

We become like a child again. People will tell us what we can or cannot do, start fussing over us like a child but we will be defiant and do whatever we want in the moment.

Change

Change happens during specific years of your life. Here are the years you will experience the most change in your life.

2-3 5-6 8-9

For example, at the age of 22-23 or at the age of 45-46 or 38-39. Years ending with these numbers will produce the largest changes in your life.

The bad thing is that, if you have a change for the worst during 8-9, it will likely stay bad for 5 years – 8-9-0-1-2, before you see change again in 2-3. But, good changes will also stick for the 5 year period.

In contrast, years ending in 1,4 or 7 will usually be years where little change occurs. Change also takes time, that's why they are 2 year groupings of change.

By the way, if you have a baby during the years of 2-3, 5-6, 8-9 you will most likely have a cesarean. Because something has to happen that is other than regular. So you will either have pain for an abnormally long time (such as a 24 hour labor) or have a cesarean.

Birthdays

Most change happens around your birthday. Think of it as slowly blending one colored paint into another colored paint.

Like you are mixing black into white. At first when it starts to mix, it will be a light grey, then become darker and darker until (if you mix enough into it), the color will be a solid black.

This is the same with changes in your years. The three months leading up to, and after, your birthday are the times in which you will see the most change in your life.

AND. If the 3 months before your birthday are good, the following year is likely to be bad, but vice versa too. If the 3 months before are bad, after your birthday things are likely to look up for you for the year ahead.

Advanced Taksa Notes

Kusatru, Kumid and Kutard Patterns.

Just as a reminder:

Kusatru means an enemy pair. When the two are together they create something new. This often leads to imbalances or problems.

Kumid are friend pairs. They are numbers that support each other in a way that the owner wants it. Although it doesn't mean that it will feel comfortable for the two together, they simple strengthen and empower one another.

Kutard are elemental siblings. They are the same element but in different form. Like flame (1) and heat (7) are both fire. An ocean (4) and a lake (6) are both water. Etc. When these are together they create an imbalance or extremes.

Sunday example

Kusatru pair: 1 and 3.

1 is in the Sunday's Boriwan, 3 is in their Deat area.

When Sunday's meet someone new they try to show off and it ruins (enemy) everything.

If a Sunday talks bluntly or really knows what they are talking about it's ok. But most of the time a Sunday will talk over or more than the knowledge they have and make up details to try and impress a person.

But that ruins everything.

Whereas...

1 Boriwan	2 RU	3 Deat
6 Kalakini		4 Sri
8 Montree	5 Usaha	7 Moola

Kumid pair 1 and 5.

For Sundays, they think they do a lot of research and think first. But like 5, they are also stubborn and think they already know the best of the best and expect others to see it as well. They will expect others to do things they way they think they should be done.

If you have a Sunday as your employee or your boss, keep in mind that once they're working, they become very detailed in their work.

Quick color Q&A: If a Sunday has to go to a meeting but doesn't want anyone to feel uncomfortable with them and they don't want to talk too much in a way that would create problems (1-3), what color should they wear?

You would need something to balance out the fire and the air.

To do this you could use number 2, yellow cream or white. Or you could use a very light green, which is 4 (ocean) mixed with 2 (wet earth) because light green also uses white in it.

Monday example

Kusatru example:

2 and 5 – enemies.

Monday people don't feel like they spend a lot of money.

But they also tend to be collectors of specific items. Like for example a "shoe lover" or a "make up lover". Then they don't care how much they spend on the thing that they love. They will buy it and keep it.

This is because 2 and 5 is the smallest Kusatru. It only illustrates discomfort. So they always question themselves over and over when they buy something, even after they bought the item. "Should I buy it.... Is it good?"

2 Boriwan	3 RU	4 Deat
1 Kalakini		7 Sri
6 Montree	8 Usaha	5 Moola

Tuesday example

Kumid example:

3 and 6 – friends.

Most Tuesdays love to work. They are workaholic. But most of the time they have a different way of working than others and people don't understand them at all.

So if you ask them to teach you, they will have trouble doing so because they have a special way to do things that works specifically for them.

3 Boriwan	4 RU	7 Deat
2 Kalakini		5 Sri
1 Montree	6 Usaha	8 Moola

Remember: Usaha shows you how a person will work and 3 is themselves. Because they are kumid, it means they support each other and are connected. 3 is specialist (has their own way) and 6 does whatever they love or desire.

Wednesday example

Kutard example:

3-8 are the same element.

Wednesday people don't want to work all the time. They want a relaxed life and want to feel happy.

You can see this because number 3 (who is the specialist who works hard) is in their Kalakini, meaning that they don't do that and don't want to be like that.

4 Boriwan	7 RU	5 Deat
3 Kalakini		8 Sri
2 Montree	1 Usaha	6 Moola

Most Wednesdays can't work straight and can't feel too serious. So they split up their work and work as they please. So they grab every job that can do that for them. That's why their sri is 8.

Because they don't want to work hard, they find careers that give them flexible work arrangements and freedom (8).

Thursday example

Kutard example:

5-2 Siblings. Same element.

Thursdays normally have reason for everything. But when they shop, they shop for other people and they feel like they cannot stop shopping.

Moola note: If you use the color for moola it means giving and taking. So when you use colors for a wallet or a purse you actually need to use two colors or it will just come and go.

One for your moola to help you have more money and the other, your Kalakini, which helps you not to use the money.

5 Boriwan	8 RU	6 Deat
7 Kalakini		1 Sri
4 Montree	3 Usaha	2 Moola

Friday example

Kusatru pairs:

8 – 4 Enemy pair.

All Friday people have 8 as their Kalakini. Most of the time they get whatever they want so easily.

And most of the time when they spend money they buy whatever they want. They don't think about other people. They only buy things for themselves and think about what they want.

For Fridays, whatever they do, even if they try to help other people, they get benefit too.

6 Boriwan	1 RU	2 Deat
8 Kalakini		3 Sri
5 Montree	7 Usaha	4 Moola

For example: If they come to you and say “I’m going to do this for you”, if you look deeply, it will be in their benefit too.

In the end, everything a Friday does is the opposite of their intention or motivation on the inside. They always want something that is opposite than how they act.

“Saying I hate you when I love you”

Saturday example

Kumid example:

4-2 friends.

Every time a Saturday comes to help you, you don’t trust them.

Here’s how Aur sees it:

Number 2 means helping others but it’s connected to their hidden self, their “bad side” which is 4, characterized by selfishness. Because the pairing is friends it creates a connection between the two.

7 Boriwan	5 RU	8 Deat
4 Kalakini		6 Sri
3 Montree	2 Usaha	1 Moola

Homework:

Review. Make sure you read and understand all the keywords of all the numbers. Next week will be the last week. Make sure you’re ready!
